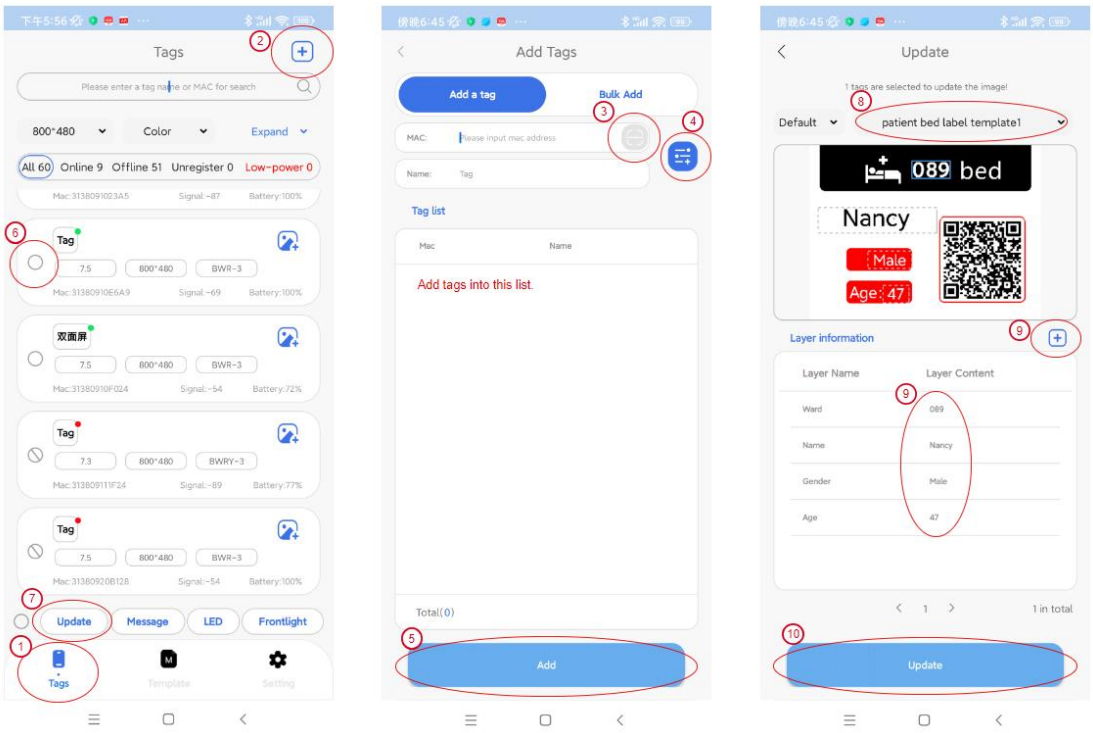
APP & E-paper Management Platform Quick Guide

1、Operation Guide for Image Updating of APP

Click on the "Paper Vision" app icon to start the Android app. The steps for adding tags and updating images are as follows:



1) **Add tags:** ①Go to the "Tags" page→ ②Click the "Add Device" button to go to the "Add Device" page → ③Click the "Scan" button to scan the MAC address barcode of the tags → ④Click the "Add to List" button

→ ⑤ Click the "Add" button to complete the tag addition;

2) **Select tags for image updating**: ⑥Check the online tags that need to be updated → ⑦Click the "Batch Updating" button to go to the updating page;

3) **Template update:** ⑧Select the image template → ⑨Add data, including 2 ways: single data addition and batch data addition through files → ⑩Click the "Update"

button to complete the image updating.

Notes:

- ✓ Before the app is installed and begin to use, it will remind the user to turn on the Bluetooth and location functions of the phone, and authorize the app to access phone files. Please follow the reminds to turn on the corresponding functions and permissions, otherwise it will affect the function realizing of picture updating.
- ✓ Due to differences in mobile operating system versions, if there are no reminds to turn on Bluetooth & location functions, or file access permissions during the app installation process, please go to the "Settings - Application Management" page of your phone to set the application permissions of the "Paper Vision" app: turn on Bluetooth function, location function, and authorize file access permissions.
- ✓ The language of this app currently only supports Chinese and English, and the default language of the app is the same as the language of the mobile operating system. If the mobile operating system is in languages other than Chinese and English, the language of the APP will be English.
- ✓ Due to the definition of the Bluetooth communication protocol, some tags may not register successfully after being added. You can try refreshing the label list (pull down the page to refresh) to complete the registration of the tag.
- ✓ To learn more about the detailed operation of the "Paper Vision" APP, please refer to the "APP Operation Guide" for the address:
