Power Consumption & Carbon Emission

The carbon emission of LCD display module is **3 to 4 times** more than that of ePaper module manufacturing.

- Indoor: The power consumption of ePaper only takes **3.3%** (1/30) of that of LCD.
- Outdoor: The power consumption of ePaper only takes **0.8%** (1/120) of that of LCD.

Assumption

Condition: A LCD digital signage screen time: display for 16h per day (lasting 3 years)
32" LCD digital signage's power consumption: 200W(Outdoor)/50W(Indoor)

Condition: An ePaper signage screen time: update once every minute, each updating only needs 1 sec
32" ePaper signage's power consumption(Outdoor/Indoor): Updating: 23.7W, Static: 1.3W

Features of ePaper Technology

Reflective Display

The stronger the light is, the clearer the display effect will be. ePaper screen has 178 ° super-wide view angle without emitting light and eye-damaging blue light, providing more comfortable reading experience with its paper-like visual performance.

Bi-stability

Continuously display and keep showcasing images or information on the screen even power off. The ePaper screen only costs 0.5W to be powered on and needs zero power to stay static display; Thus, its application reduces repairing cost with the wireless installation, also decreasing total cost with ePaper solution.

Full-color ePaper Technology

Development of High-resolution

Create a new era of advertising display

SEEKINK Spectra 6 products adopt advanced E Ink Spectra 6 Colored ePaper display technology, and the technology has excellent color displaying performance, high resolution and incredible contrast, rendering every advertisement blooming wonderful visual charms. With DPI 200 ppi, meanwhile, it has wider range of environmental temperature and consumes shorter time on updating images, conforming to the ESG trend on energy conservation and carbon-emission reduction.

Applications in Retailing Scene

Catchy Color Displaying Performance

Distinguished visual showcasing effect with high resolution brought by colored ePaper technology, can efficiently attract consumers, thus improving the conversion rate.

Easy Content Management

The flexibility brought by real-time updating advertising and product information is able to rapidly response to market changes, keeping freshness of displaying contents, and promote consumers to purchase.

Reduction on Total Cost

The ePaper screen does not consume power when staying static display, decreasing the power output. Therefore, its durable design and less maintenance need make the cost on long-term operation remarkably lower, also an oxidizer of realizing higher economic benefits for retailers or brands.

Ready-to-use Installation

The ePaper billboards in multiple sizes require no power supply and have no installation requirement on complex cable, allowing itself to be easily wall-mounted or placed at any position for promotion or advertising.

Full-Color ePaper Billboard

S315E6

S253E6

S133E6

Overview

The wall-mounted advertising device series (S133E6, S253E6, S315E6) utilizes advanced E Ink Spectra 6 colored ePaper display technology, paired with an elegant wood grain frame design, adding a natural and modern aesthetics to the commercial environment. This series of products have different screen sizes (13.3 inches and 25.3 inches, 31.5 inches) to meet the needs of different places and display targets.

Six colors of electronic ink particles are dynamically combined and precisely mixed through voltage control to achieve the display of 60,000 full-color gamut images. The display showcases excellent color performance, ensuring that advertising information is presented with extremely high contrast and true colors.

In addition, the wall-mounted design allows the integrated advertising devices to fully utilize the wall space and to be perfectly integrated into various commercial environments. Users can easily change the content and update the information in real time to meet different publicity needs.

Specifications

Product	Model Name	S315E6	S253E6	S133E6
Module parameters	Display Size(diagonal)	31.5 inches	25.3 inches	13.3 inches
	Display Type	E Ink Spectra 6		
	Color	Red, Yellow, Blue, White, Green, Black		
	Display Viewing Area(H*V) (mm)	696.32*391.68mm	560*315mm	202.8*270.4mm
	Resolution	2560*1440	3200*1800	1600*1200
	Aspect Ratio	16:9	16:9	4:3
	DPI	93	145	150

	Working Temperature	0℃~50℃		
	Humidity	30%~90%		

31.5 " Full-Color ePaper Signboard

Overview

The S315E6-S ePaper vertical billboard utilizes E Ink Spectra 6 colored display technology, creating a new era of POP(Point of Purchase). The six kinds of colored electronic ink particles as red, yellow, blue, white, green and black are dynamically combined and precisely mixed by voltage control to achieve the display of 60,000 full-color gamut images. A new colored ePaper drive waveform structure is utilized to improve the color display contrast, making the image more vivid and brighter, bringing the unparalleled visual charm to each advertisement.

Compared with wall-mounted billboards, S315E6-S stands out for its excellent flexibility and portability. Users can easily move it and freely switch the locations of the advertising display to different places to meet diverse business demands. Whether for promoting products, publishing promotional information, or displaying brand images, event consultation and exhibition guidance, it can bring you eye-catching advertising effects and add luster to your brand!
